Awnings

You will be shown how to set up the awning. Use extreme care as awnings damage easily. Awnings must be *retracted* in windy conditions, when you are absent, and we suggest, at night. Properly drain of rainwater by lowering one corner slightly to prevent damage, always stake down the awning. Ensure that awnings are raised high enough over the entrance door so rubbing does not occur. Keep fires well clear of the awning.

Note: Use of the awning is the sole responsibility of the renter. If the awning is deployed then it is recognized that the renter has agreed to accept all responsibility for the awning and therefore, you will be financially responsible for any damage

Air Conditioning

Be aware that the A/C requires a little attention. It is important not to over use the A/C. If operating please close windows and vents. If you are planning to be absent please turn the A/C off.
